## INSTRUCTION FOR USE

# Ovena Health Collagen Wound Dressing

**Description**

Ovena Health Collagen Wound Dressing is comprised of a porous matrix of a cross-linked bovine collagen. Ovena Health Collagen Wound Dressing is a sterile single use white or off white, pilable absorbent and biodegradable wound dressing.

When the wound dressing absorbs wound exudate or sterile water, Ovena Health Collagen Wound Dressing transforms into a soft comfortable gel sheet, maintains a moist wound enviornment, to protect the wound and support natural healing.

Ovena Health Collagen Wound Dressing can be used as a primary wound dressing in direct contact with the wound or be used in the combination with other suitable secondary dressings. The dressing can be cut to the exact size of the wound, and can be used in multiple layers

**Indications**

Ovena Health Collagen Wound Dressing is intended for the management of wounds inclusing:

- Full thickness and partial thickness wounds
- Pressure ulcers
- Venous ulcers
- Ulcers caused by mixed vascular etiologies
- Diabetic ulcers
- Partial thickness burns
- Donor sites and other bleeding surface wounds
- Abrasions
- Traumatic wounds healing by secondary intention
- Dehisced surgical incisions

**Caution**

Federal law restricts this device to sale by or on the order of a physician.
Discontinue use and contact a physician if any adverse reactions and abnormal symptoms occur.
Refer to product instructions for complete product information.

**Contraindication**

Ovena Health Collagen Wound Dressing should not be used on patients sensitive to bovine collagen, third-degree burns or wounds with active infection.

**Precautions**

Dressings are suitable for use under compression under proper supervision by a healthcare professional.
Do not use with uncontrolled clinical infection.
Do not use if the package seal is broken.
Do not use dressing after expiration date.
Discard device if mishandling has caused possible damage or contamination.
Discard all open and unused portions of dressing.
Do not re-sterilize.
Do not reuse.
The proposed maximum usage is up to 900 $cm^2$ per day per user.

**Instructions for use**

**A. Preparation of wound bed**

1. Prepare the wound bed by normal procedures such as irrigation/ cleaning with sterile isotonic saline solution or sterile water, and if necessary debridement to ensure the wound is free of debris, necrotic tissue or infected tissue.
2. Gently dry the surrounding of the wound.

**B. Application of Dressings**

1. Remove device from pouch and cut the dressing to better match the wound area with standard aseptic/sterile technique.
2. Apply the dressing directly to the wound bed, and rehydrate the dressing with sterile water or saline if the wound bed is dry.
3. Based on the wound type, the wound may be covered with a suitable secondary dressing.
4. Discard any unused portion of the device.

**C. Dressing changes**

1. Change the secondary dressing as needed. Change the Collagen Wound Dressing as best wound care practice suggests.
2. Collagen Wound Dressing will be essentially degraded and resorbed within approximately 6 weeks based on subcutaneous implantation study in rat. Duration of treatment and reapplication is determined by the physician according to the wound conditions.
3. The product is composed of 100% collagen and is biodegradable.

**Specification**

| Size | | | Unit |
|---|---|---|---|
| 2.5x2.5 | 15x15 | 25.5x12.7 | cm |
| 5x5 | 10x2 | 30x20 | |
| 10x10 | 17.8x17.8 | 30x30 | |

**Storage and disposal**

Store in clean, cool and dry place
Avoid excessive heat and high humidity.
Do not store above 30°C/86°F
Disposal should be handled according to local environmental procedures.

**Shelf life**

5 years from date of manufacture.
