Instruction for Use

OVENA HEALTH

Ovena Health Collagen Powder

Size: 1 gram

Description

Ovena Health Collagen Powder is a native bovine collagen wound dressing that is sterile, white to off-white, absorbent and resorbable powder. Ovena Health Collagen Powder maintains a moist wound environment to support wound healing. Ovena Health Collagen Powder can be applied to a wound either in the dry state or prehydrated with sterile saline, and can be used in conjunction with other suitable secondary dressings indicated for wound management. The device is intended for one time use.

Indications

Ovena Health Collagen Powder is intended for management of wounds including

- Full thickness and partial thickness wounds
- Pressure(stage I-IV) and venous ulcers
- Ulcers caused by mixed vascular etiologies
- Venous stasis and diabetic ulcers
- 1st and superficial second-degree burns
- Cuts
- Abrasions
- Surgical wounds

Caution

Federal law restricts this device to sale by or on the order of a physician. Discontinue use and contact physician if any adverse reactions and abnormal symtoms. Refer to product instructions for complete product information.

Contraindication

Ovena Health Collagen Powder should not be used on patients sensitive to bovine collagen or third-degree burns or wounds with uncontrolled clinical infection.

Precautions

Do not use with uncontrolled clinical infection.
Do not use if the package seal is broken.
Do not use dressing after expiration date.
Single use product. Do not reuse or re-sterilize.
Discard device if mishandling has caused possible damage or contamination.
Discontinue use and contact a physician if any adverse reactions and abnormal symptoms occur.

Instructions for use

1. Preparation of wound bed

Prepare the wound bed by normal procedures such as irrigation/cleaning with sterile isotonic saline solution or sterile water, and if necessary debridement to ensure the wound is free of debris, necrotic tissue or infected tissue. Dry the surrounding of the wound gently.

2. Application of Dressings

Using standard aseptic/sterile technique, remove device from packet and light apply sufficient powder to cover the wound bed, re-hydrate in a separate container with sterile water or saline to form a paste if the wound location or geometry makes dry application difficult.
Apply a suitable secondary dressing to secure and protect Collagen Powder.

3. Dressing changes

When Ovena Health Collagen Powder is re-applied, change the secondary dressing as needed.
Remove secondary dressing, and carefully cleanse the wound in accordance with standard procedures, and it is not necessary to remove residual of gel.
The product is composed of 100% collagen and is biodegradable. Duration of treatment and reapplication is determined by the physician according to the wound conditions.
